

Money Machine[®] 2

Self-Service Coin Counter

A better option for coin-counting services

A better way to offer coin-counting services in your stores

You may think all coin-counting equipment is the same, but it's not. Money Machine® 2 is next-generation technology that is faster, highly accurate and very easy to use. Best of all, it's affordably priced, giving you more options to increase revenue from a service your customer expects.

Why does the equipment matter?

Better equipment equals a better customer experience and that's a positive reflection on your store and your brand. Customers want to redeem their coins quickly, easily and using a quiet machine. Money Machine 2 offers all that plus reliable operation so the coin counter is up and running when customers want to use it.

Increase revenue. Choose the type of coin counter that works best for you. With sorted or mixed bag and single or dual bin model options, you can decrease coin management costs and increase machine up-time.

Better ROI. You can buy, lease, rent or use our placement model, depending on how you want to manage coin-counting services.

These choices are also available with our hands-free Coin Management Program, making it easier than ever to get the best ROI.

Coin recycling

Reduce your spend on purchased coin by recycling what you take in from coin-counting machines. Let us help you evaluate your options.

Risk-free, hands-free operation

Depending on your business objectives, we offer different programs to meet your needs. We can manage the entire operation for you, you can manage it yourself, or anything in between. Compare options and see how Cummins Allison can be flexible to help your store revenue grow.

Compare your options and grow your revenue

Program/ Product	Profit Projections*		Years Payback	Profit % of Coin Volume
	5 Years	10 Years		
Purchase/Bag	\$48,305	\$110,735	1.4	6.6% - 8.6%
Lease/Bag	\$42,935	\$105,365	1.6	5.9% - 8.6%
Rent/Bag	\$40,870	\$81,740	N/A	5.6%
Purchase/Bin	\$35,285	\$85,110	2.1	4.8% - 6.8%
Lease/Bin	\$29,765	\$79,590	2.4	4.1% - 6.8%
Placement/Bin	\$10,920	\$21,840	N/A	1.5% - 2.5%

* Based on 16 bag and dual bin MM2 with \$2,800 per week coin volume and 10.9% user fee. Includes all costs for managing machine and coin pickup/processing. All bin machine programs based on Cummins Allison managing pickup, processing and reporting.

Accurate and reliable

Customer-driven technology

Money Machine 2 self-service coin counters are the fastest high-capacity coin processors in the industry. The patented technology used in Money Machine 2 sorts and counts at speeds up to 4,100 coins per minute. This robust, high-speed operation gives your customers the best-in-class service expected of your store.

Accuracy and dependability

Balancing is easy when counts are accurate. Money Machine 2 processing is intuitive and precise, with 99.995% accuracy. This translates into worry-free operations, and greater efficiency at your service counter.

Unmatched dependability – warranted to 50 million mixed coins – ensures uninterrupted service to your customers and customer service personnel. Money Machine 2 is designed with only one moving part, which means fewer jams and lower maintenance costs.

World-class service and support

Cummins Allison service technicians stand behind each product. Delivering dependable, local service and parts inventories, each skilled professional is trained to maintain your specific machine requirements. Cummins Allison service gives unparalleled, 97% satisfaction to customers day in, day out, year after year.

Faster, more reliable machines let your customers count their change and get on with their shopping – quickly.

Money Machine[®] 2 features and options

Money Machine 2 is built for fast, effortless operation and best-in-class reliability. Designed to maximize customer satisfaction, it provides tremendous feature flexibility to suit your preferences and operational requirements.

Coin-collection systems

A choice of five coin-collection systems makes coin management and pickup flexible from store to store. Bag machines can be configured to sort or mix coins for continuous processing, less frequent bag changes and reduced coin pickups.

- Bag capture with 16 sorted bags – 78,000 coins total
- Bag capture with 16 mixed bags – 80,000 coins total
- Bag capture with 8 sorted bags – 36,000 coins total
- Single bin – 70,000 mixed coin capacity
- Dual bins – 140,000 mixed coin capacity

Each system simplifies coin management for your store.

A through-the-wall configuration for either bag or bin allows select activities to be performed at the back of the machine for secure, behind-the-scenes coin management.

High-strength, polymer bins are easy to change with lightweight dollies and can be stacked for easy storage.

Bag collection sorts or mixes coins into 16 high-volume bags for a capacity of up to 78,000 or 80,000 coins. Bag stations roll out for easy access.

Mixed bag with label printer shown above.

Customizable touch-screen display

A large 15" color touch-screen guides customers through the coin-counting process. Custom graphics, images, and multilingual text give you the flexibility you need to promote products and services as well as cater to a diverse audience.

On-screen advertising

Advertise products and services through fixed images or continuous-play videos. On-screen advertising provides high visibility to your most important promotions.

Dual-bin coin collection minimizes interruptions and maximizes machine uptime.

Machine graphics

Outfit your coin-counting machines with eye-catching graphics. Use the standard graphics shown, use customized graphics to reflect your brand, or opt for attractive stainless steel panels and add top sign graphics only.

Choose how coin counting is added to your store

When compared to the competition, we give you more choices for adding or replacing self-service coin machines.

Attractive machine graphics bring attention to your coin counter and help increase usage.

Have a Money Machine placed in your store, rent or lease a machine, or own your own Money Machine. You have the freedom to choose the best option, and your customers enjoy the convenience of a self-service coin machine.

Hands-free coin management

Our unique Coin Management Program (CMP) includes bin or mixed bag pickup from an approved logistics company, along with coin processing, program administration and electronic bank deposits within three days of your bin or mixed bag deposit.

CMP also removes risks associated with employee-handled coin. We monitor your machine online through our JetLink™ software and dispatch service, mixed bag or bin pickup when needed. You'll also receive monthly reports detailing the revenue you're producing.

Annual server access and activation are free to CMP customers. Machines on CMP are required to have preventive maintenance and remote management agreements.

Operational benefits: Work with your local Cummins Allison representative to determine which combination of program options best meets your business needs, risk level and revenue objectives.

Program/ Product	Profit (1)	Risk-Free	Hands-Free		Recycle Coin

(1) Includes all costs for managing coin. (2) Store manages coin. (3) Cummins Allison manages coin for bin or mixed bag machines.

Money Machine® 2 self-service coin counter

Standard features

High-speed processing: At speeds as fast as 4,100 coins-per-minute, Money Machine 2 boasts the fastest coin sorting in the industry.

Advanced debris management: Debris such as paper clips, screws, bolts and bent coin are diverted to a debris cup for easy disposal.

Continuous suspect coin detection: Suspect coins are diverted to a coin-return cup uncounted, maintaining the unmatched coin-sorting speed.

Transaction memory and reporting: More than 30,000 transactions are stored in the Money Machine 2 memory. Daily reports can be easily obtained by authorized employees at any time. Supports 100 individual user passwords.

Customizable screen display: Customized text and graphics may be used on the customer greeting screen. Service fee amounts and fee disclaimers can also be specified here.

Kiosk-style printer: Thermal kiosk-style printer with auto-cut printer with presenter. Light activates when receipt is ready; interface notifies attendant of low paper or paper out.

Customizable transaction receipt: Print a logo with up to four lines of text at the top and bottom of the patron receipt (allows two logos total).
