

KDL-100

High volume cash deposit system for back office environment at medium and large-sized retail businesses

With noticeable characteristics of high speed note validation and real-time monitoring of cash levels and provisional credit, KDL-100 is a cash management system tailored for medium and large-sized cash intensive retail businesses handling large amounts of cash, enabling operators to make unsupervised deposits at the end of their shifts at the back office.

Validated cash is immediately stored into the note safe, greatly reducing exposure to loss or theft as well as cash handling costs.

FEATURES

High throughput

Minimizes note jams and rejects utilizing the automatic note holding unit and well-streamlined transport paths on the basis of Kisan's unique note validation technology

High users' confidence in deposit amount

Enables users to ensure their deposit amount by counting and confirming the cash optionally before making a deposit

High serviceability

Employs the built-in slide rails to clear note jams on the note validator easily without the need for a service call, reducing cost and time

SPECIFICATION

Dual
CIS

Auto
Currency

Model	KDL-100
Processing speed	1000 npm
Hopper capacity	400 notes
Reject Capacity	50 notes
Doposit capacity	Max 10,000 notes / Canvas bag
Serial no.	0
Functions	Value counting, multi and mix currency, S/N(OCR)
Detect	Dual CIS, UV, MG(18ch), IR, US
Connections	RS232C LAN
OS	Linux
Display	7" Color LCD-Touch
Dimensions	450x500x1227(All) 450x500x461(Module) 450x500x766(Safe)
Options	Magnetic Card, IC Chip Card, UPS, PC Board, Barcode reader
